### **Reference Letter for Jukka Construction, Ashley Svensson**

We have appointed Ashley for the build of our new family home in Waterfall Country Estate. Before appointing Ashley we have met with him and several other contractors.

Starting from the first meeting, Ashley has been demonstrating his professionalism, knowledge and transparency with regards to his work, quote, pricing etc. Ashley was extremely well prepared and could engage on specific questions directly with us and could also put forward ideas, suggestions etc. all in line with our brief. This made us confident that he is the right man for the job.

This positive engagement continued throughout our building and construction process which Ashley manages openly, transparently and with excellent cost control. Any items requiring changes are discussed and we received the advice and feedback we expect, which was always happening in a constructive and fair manner as well as with the requisite lead times which shows his forward planning. This in turn puts you never in a rush to make decisions.

Ashley has been able to meet expectations and has delivered according to plan in a very professional, but personal manner with the right attention to detail. Delivery, expert advice, transparency, cost control and an absolute level of integrity do not let us hesitate to recommend Ashley as a contractor of choice for any building or renovation needs. He and his team realised our new home from start to finish.

Sincerely,

Hannes and Meroonisha Kerber
